

ASYLUM LEVELS AND TRENDS IN INDUSTRIALIZED COUNTRIES

SECOND QUARTER 2007

**Statistical Overview of Asylum Applications Lodged
in 31 European and 5 Non-European Countries**

Division of Operational Services
Field Information and Coordination Support Section
September 2007

Introduction¹

This report summarizes the main levels and developments in the number of individual asylum claims submitted in 36 industrialized countries² during the first six months of 2007. The number of countries included in this report is limited to 31 European and 5 non-European States that currently provide monthly asylum statistics to UNHCR. Italy is the only major industrialized country which is not in a position to provide this type of data.

Statistical information on asylum-seekers recognized as refugees, those granted a complementary form of protection (humanitarian status, subsidiary protection etc.) or refugees who have been resettled, particularly by Australia, Canada and the United States of America, are published in separate UNHCR reports.³

To the extent possible, the statistics presented in this document reflect the number of asylum-seekers lodging an application for the first time. However, it appears that a significant number of countries included in this report can not distinguish new asylum applications from reopened or repeat claims in their respective statistical systems. As a consequence, some of the numbers of asylum applicants reported to UNHCR are likely to be overestimated (*see Box 1*). Moreover, although asylum-seekers are counted only once in each country, the total number is inflated because some individuals seek asylum in more than one country.

All figures based on monthly statistics⁴ should be considered as provisional and subject to change. Some of the data may also differ from those reported in previous UNHCR documents due to retroactive changes or adjustments.

Most of the data in this report refer to the number of individuals. For the United States of America, however, only the number of cases (which can include several individuals) rather than individuals is available for applications submitted to the Department of Homeland Security (DHS). UNHCR has therefore multiplied the total number of asylum cases by a factor of 1.4 to estimate the number of individuals since it is assumed that on average one case equals 1.4 individuals. Applications submitted to the Executive Office of Immigration Review (EOIR) are recorded as individuals. Owing to the large variation of family size by nationality, the analysis by country of origin in the United States of America is thus based on a combination of the number of cases (DHS) and the number of individuals (EOIR).

Box 1. New vs. repeat/reopened applications: the case of the Netherlands

Up to July 2006, asylum statistics reported by the Immigration and Naturalization Service (IND) of the Netherlands did not make a distinction between new asylum claims and second/repeat applications. As from July 2006, however, this distinction has become possible due to improved statistical systems.

A first analysis shows that in fact only 65 per cent of claims submitted during January - June 2007 (4,672) were lodged by new asylum-seekers. The remaining 35 per cent were second, subsequent or other types of applications previously included in official reporting. It can be concluded that the number of new asylum-seekers prior to 2007 was overestimated.

The figures for the Netherlands reported in this document include new, repeat and second applications up to the end of 2006. From January 2007 onwards, however, all data refer to new applications only and are thus not comparable with earlier figures.

¹ This report has been prepared by the Field Information and Coordination Support Section (FICSS), Division of Operational Services (DOS) at UNHCR Headquarters in Geneva. Any questions concerning the report should be addressed to FICSS at stats@unhcr.org. For other UNHCR statistics, see UNHCR's newly-launched Statistical Online Population Database at <http://www.unhcr.org/statistics/populationdatabase>.

² The category "industrialized countries" has been defined for the purpose of this report only. It refers to the 27 Member States of the European Union, Iceland, Liechtenstein, Norway, Switzerland, as well as Australia, Canada, Japan, New Zealand, and the United States of America.

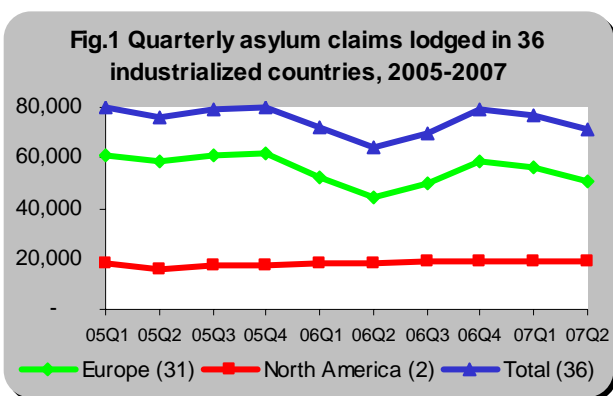

³ See UNHCR's 2006 *Global Trends* report (issued June 2007).

⁴ UNHCR's compilation of monthly statistics on individual asylum applications started in 1999 and included initially 24 European countries.

With the exception of a few countries, separate statistics for asylum-seekers originating from Serbia or Montenegro are not yet available. In order to ensure comparability of the 2007 data with previous years, Serbia and Montenegro are referred to as one entity throughout this document. UNHCR is hopeful that in the future Governments will be able to separate nationals from Serbia and Montenegro in their national asylum statistics.

Regional trends

Over the past few years, the overall number of new asylum claims submitted in the 36 industrialized countries covered by this report has decreased continuously. This trend, however, was reversed in the second half of 2006 when numbers started to rise. Even though they were falling again during the first half of 2007, in particular during the second quarter, the total number of asylum applications lodged in industrialized countries in 2007 can be expected to be higher than in 2006. An analysis of semester trends of monthly asylum data available to UNHCR (1999-2007) shows a relatively clear pattern. Every year, with the exception of 2004, the number of asylum applications submitted during the first semester was lower than during the second semester. Assuming that current patterns remain unchanged, it can be expected that the total number of asylum claims lodged in the 36 industrialized countries in 2007 might be between 290,000 and 320,000. In other words, the number of asylum claims lodged during 2007 might go up by possibly 10 per cent, the first increase since 2001.

During the first half of 2007, an estimated 147,500 individuals applied for asylum in the 36 industrialized countries, nine per cent more than compared to the corresponding period of 2006 (135,700), but slightly below the level of the second half of 2006 (149,100). As such, the first semester of 2007 witnessed the second lowest level since at least 1999.

In the 31 **European** countries included in this report, some 107,000 new asylum applications were submitted during the first six months of 2007, 10 per cent more than during the corresponding period of 2006 (97,000) and only marginally lower (-1%) compared to the second half of 2006 (108,300). The 31 European countries accounted for 73 per cent of all claims lodged during the first six half of 2007.

The trend is identical for the 26 countries of the **European Union (EU)** covered by this report.⁵ They registered 99,000 new asylum applications during the first six months of 2007, virtually the same as during July to December 2006 (99,500), but 10 per cent more than compared to the first half of 2006 (89,800). The 26 EU member States thus accounted for 67 per cent of all asylum claims lodged during the first six months of 2007.

Semester applications lodged in Europe and EU

	1 st 2005	2 nd 2005	1 st 2006	2 nd 2006	1 st 2007
Europe (31)*	120,900	123,100	97,500	108,800	107,500
EU-total (26)*	113,000	113,900	89,800	99,500	99,000
EU-old (14)*	100,400	99,800	81,000	88,600	89,500
EU-new (12)	12,500	14,100	8,700	11,000	9,500

* Excludes Italy for which no data is available.

The overall development in the EU, however, hides significant subregional differences among the 26 EU member States. The **14 “old” member States** (excluding Italy) recorded a continuous increase from the first (81,000) to the second semester of 2006 (88,600) and to the first half of

⁵ Italy is not included in this report due to a lack of data.

2007 (89,500). The **12 “new” member States**, however, recorded a 26 per cent increase during the second semester of 2006 (11,000 claims) compared to the first one (8,700), and experienced a 13 per cent drop in the first half of 2007 (9,500). The current relative share of asylum applications received by the **12 “new” EU member States** as compared to the total European Union has decreased from its most recent peak in late 2004 (16% share) to 10 per cent.

Countries in **Central Europe** witnessed a strong decline in the number of asylum-seekers during the first six months of 2007. Central Europe had been an important receiving region only a few years ago, however, fewer people have requested asylum in recent years. During the first two quarters of 2007 some 5,900 asylum applications were submitted, 2,000 fewer than during the second half of 2006 (-26%) but virtually the same level as during the first two quarters of 2006 (6,000).

With the exception of Malta, all countries of **Southern Europe** in this report experienced a significant increase in asylum applications in the first two quarters of 2007 compared to the last two quarters of 2006. This is on the one hand due to new arrivals, particularly from Iraq, and on the other hand to the continuous implementation of improved registration systems allowing a faster recording of asylum claims (i.e. Greece). In total, some 22,600 asylum applications were recorded during the first semester of 2007, almost the same number as during the whole of 2006 (23,500).

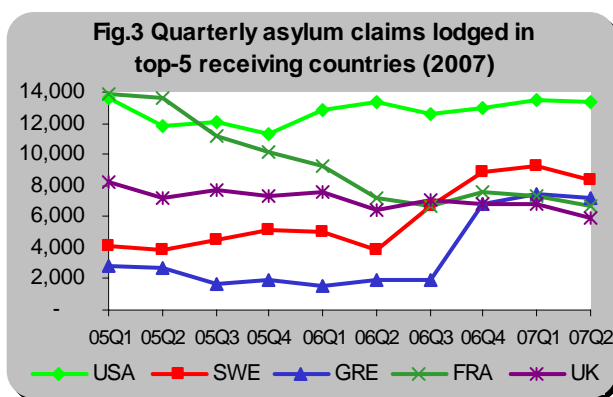

Similar to Southern Europe, the **Nordic region** accounted for an increase in new asylum claims, albeit at a lower level. Here, a total of 21,600 persons applied for refugee status between January and June 2007, a five per cent increase compared to the last two quarters of 2006 and a striking 60 per cent more compared to the first two quarters of 2006 (see Table 1). This large increase has been caused primarily by the continuous arrival of large numbers of Iraqi asylum-seekers in Sweden.

The number of asylum claims submitted in **North America** has remained fairly stable during the first six months of 2007 (38,200) compared to the second semester of 2006 (38,400). Both figures are, however, higher than in previous semesters, most notably of 2005 when on average an estimated 34,200 individuals submitted an asylum claim each semester. The number of asylum-seekers in **Australia** during the first half of 2007 (2,000 claims) was the highest on record since the second semester of 2003.

Countries of asylum

Until recently, Austria, Canada, France, Germany, the United Kingdom, and the United States of America have been the main destinations for asylum-seekers arriving in industrialized countries. During 2007, however, other countries started to emerge as major recipients of asylum-seekers.

The **United States of America** has been the by far largest recipient of new asylum claims during the first six months of 2007. An estimated 26,800 individuals submitted an application, some 1,200 (+5%) more than during the second semester of 2006 and slightly more than during the first semester of 2006 (26,200) (see Figure 3). During the first semester of 2007, the United

States of America also received almost every fifth application lodged in the 36 industrialized countries covered by this report. The share of the United States in the number of new asylum claims received among the group of industrialized countries remained fairly stable in recent years, ranging between 16 and 19 per cent (see Figure 4).

With a continuous high number of arriving Iraqi asylum-seekers, **Sweden** remained the second largest recipient of new asylum claims throughout the first semester of 2007. A total of 17,700 people applied for asylum during this period, a 14 per cent increase compared to the 15,500 claims which had been lodged during the second semester of 2006 and a doubling of claims when compared to the first six months of 2006 (8,900). As such, Sweden's share in the distribution of received asylum claims among the 36 industrialized countries increased significantly from five per cent in early 2005 to 12 per cent in 2007 (see Figure 4).

With a continuous high number of arriving Iraqi asylum-seekers, **Sweden** remained the second largest recipient of new asylum

claims throughout the first semester of 2007. A total of 17,700 people applied for asylum during this period, a 14 per cent increase compared to the 15,500 claims which had been lodged during the second semester of 2006 and a doubling of claims when compared to the first six months of 2006 (8,900). As such, Sweden's share in the distribution of received asylum claims among the 36 industrialized countries increased significantly from five per cent in early 2005 to 12 per cent in 2007 (see Figure 4).

With a record-high of 14,700 new asylum applications recorded between January and June 2007, **Greece** became the third most important destination of asylum-seekers among the 36 industrialized countries, receiving on average one out of 10 applications (see Figures 3 and 4). It should be noted, however, that, in addition to reflecting an increase in new arrivals, particularly of Iraqi citizens, the Greek authorities introduced special procedures in late 2006 to clear the backlog of asylum-seekers who want to register. As a consequence, the 14,700 applications recorded during the first six months of 2007 almost equalled the total number of claims (15,800) which had been registered during the previous 18 months (July 2005 - December 2006).

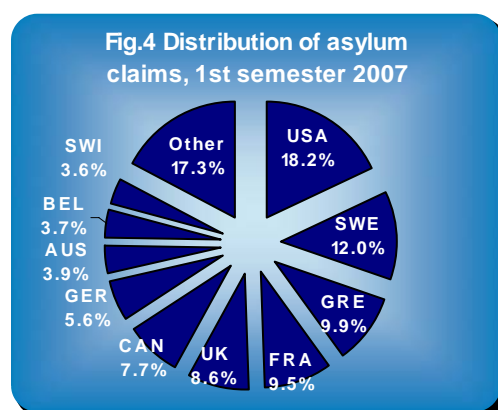

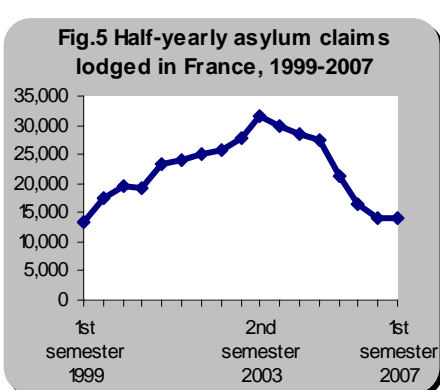

Fig.4 Distribution of asylum claims, 1st semester 2007

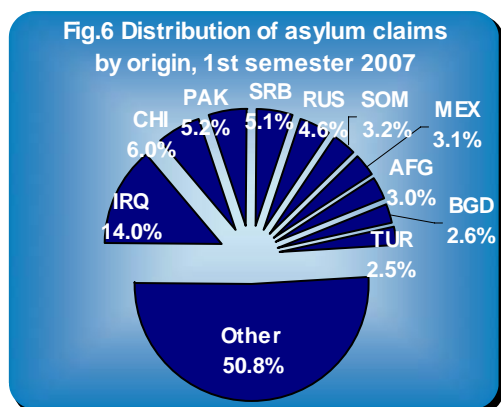

France has been the leading asylum-seeker receiving country among the group of 36 industrialized countries for much of 2003, 2004 and 2005. However, since mid-2005, the country has witnessed a sharp decline in the number of new asylum claims. As a consequence, the 14,000 claims submitted between January and June 2007 made France the fourth largest recipient and constituted the lowest semester level since at least the first semester of 1999 (13,200) (see Figure 5). As a result of this steady decrease, France's share in the number of new asylum applications received among the 36 industrialized countries went down from almost 20

per cent to close to 10 per cent (see Figure 4). The **United Kingdom** ranked fifth among the 36 industrialized countries with 12,700 new applications received during the first two quarters of 2007, followed by **Canada** (11,400), **Germany** (8,200), and **Austria** (5,700).

Two thirds of the countries included in this report experienced a reduction in the number of new asylum claims lodged from the second semester of 2006 to the first semester of 2007, including large receiving countries such as **Austria** (-19%), **Germany** (-18%), **Norway** (-18%), **Canada** (-11%), the **United Kingdom** (-9%), and **Belgium** (-9%). The **Netherlands** also recorded a

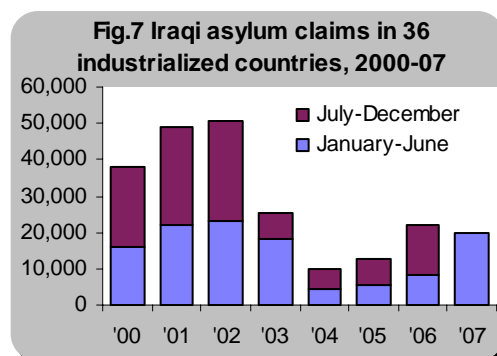

significant decline (-44%), however, because the 2007 data now excludes repeat and reopened applications, in contrast to pre-2007 figures, data are not comparable (*see Box 1*). Most of the remaining one third reported an increase, including **Greece** (+65%), **Spain** (+49%), **Cyprus** (+34%), and **Sweden** (+14%) (*see Table 1*).

Origin of asylum-seekers

Iraq remained the leading country of origin of asylum applicants during the first six months of 2007 with 19,800 requests, or 14 per cent of all claims, lodged by its citizens in the 36 industrialized countries covered by this report. **China** was the second most important source country of asylum-seekers with 8,600 claims, or six per cent of all claims, followed by **Pakistan** (7,300), **Serbia and Montenegro** (7,200), and the **Russian Federation** (6,500) (*see Figure 8*).

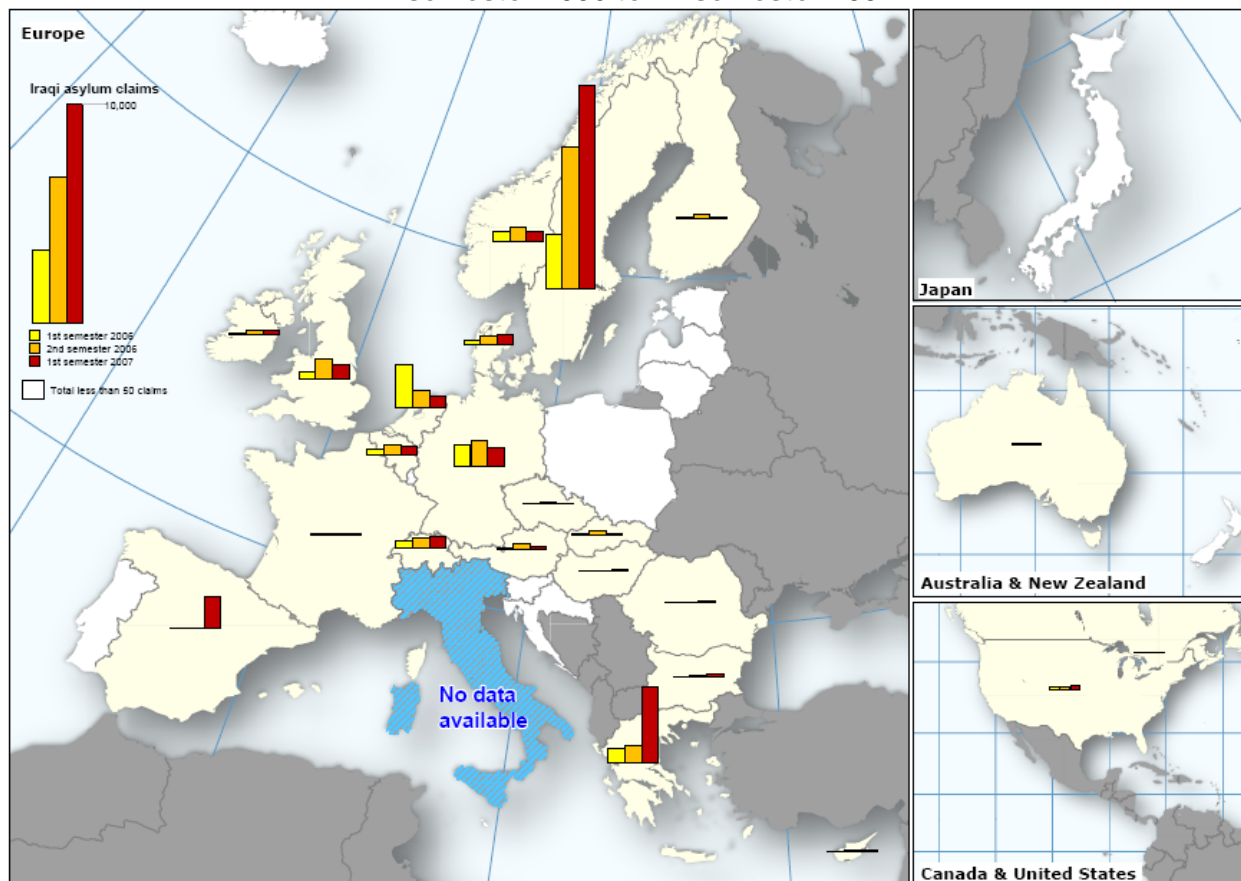

Iraq again became the main country of origin in 2006. This trend has continued into 2007 with the sectarian divide in the country deteriorating and without a political solution in sight. Some 19,800 asylum claims were lodged by Iraqi citizens in the 36 industrialized countries during the first six months of 2007, an increase of almost half (+45%) compared to the last six months of 2006 (13,600), and more than double in comparison to the first six months of 2006 (8,500 claims). If current trends are maintained, the number of Iraqi asylum claims might reach the peak levels witnessed between 2000 and 2002, when, annually, an average of 40,000 to 50,000 Iraqis sought asylum in the 36 industrialized countries.

The increase in Iraqi claims was particularly significant in the first quarter of 2007 when 10,200 Iraqis applied for asylum in the 36 industrialized countries, the highest quarterly level since the first quarter of 2003. In the first six months of 2007, Iraqis lodged asylum applications in 28 out of the 36 industrialized countries covered by this report. Some 9,300 applications or almost half of the 19,800 Iraqi applications (47%) were submitted in Sweden alone. The large Iraqi community and its strong social network in Sweden might be part of the reasons for the high concentration of Iraqi asylum-seekers going to that country. Greece registered some 3,500 Iraqi claims between January and June 2007, as compared to 1,400 during the whole of 2006, while Spain and Germany recorded 1,500 and 820 applications respectively during the first semester of 2007. It should be noted that almost all Iraqi claims recorded in Spain were submitted at the Spanish embassy in Cairo. The map on page 7 illustrates the evolution of Iraqi asylum claims during the past 18 months.

The share of Iraqi asylum-seekers in the total number of asylum claims has increased steadily in past years. During 2005, the share ranged between four and five cent, increased to six and seven respectively during 2006, and reached its peak during the first two quarters of 2007 with 14 per cent of all asylum claims in the 36 industrialized countries being lodged by Iraqis. In other words, in the first six months of 2007, one out of seven asylum claims was lodged by an Iraqi citizen (*see Figures 6 and 7*).

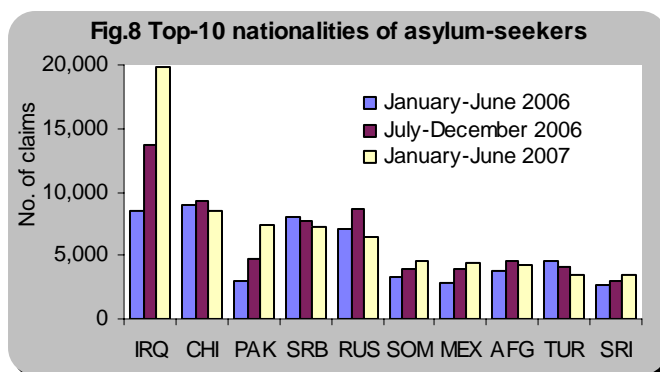

Trends in Iraqi asylum claims lodged in 36 industrialized countries:
1st semester 2006 to 1st semester 2007

Note: Figures for the **Netherlands** prior to 2007 include repeat and reopened applications and are thus not comparable with 2007. Figures for **Spain** include Iraqi asylum applications lodged at the Spanish embassy in Cairo.

Similar to the second semester of 2006, **Chinese** asylum-seekers were the second largest group, with 8,600 new claims recorded during the first six months of 2007, accounting for six per cent of all asylum claims. The number of Chinese asylum-seekers in the 36 industrialized countries has remained relatively stable in 2005 and 2006, with on average between 4,400 and 4,800 new applications being lodged per quarter. The first two quarters of 2007, however, witnessed a slight drop in the number of new Chinese asylum claims. While during the first quarter of 2007, close to 4,400 claims were registered, the second quarter saw less than 4,200 claims, the lowest value since the fourth quarter of 1999.

The number of new asylum applications submitted by citizens from **Pakistan**, the third most important source country of asylum-seekers in the 36 industrialized countries (7,300 claims), has increased significantly during the first two quarters of 2007. This is primarily the result of new registration procedures implemented in Greece. Here, the number of registered Pakistani asylum-seekers went up from some 370 claims during the third quarter of 2006 to 1,700 in the fourth quarter, and to 2,700 and 2,000 respectively during the first two quarters of 2007.

The number of asylum-seekers originating from **Serbia and Montenegro**⁶ and the **Russian Federation**, the two leading countries of origin of asylum-seekers in 2005, continued to drop during the first semester of 2007. The former recorded some 7,200 new claims, six per cent fewer than during the preceding semester and nine per cent less compared to the first semester of 2006. Russian asylum-seekers submitted 6,500 applications during the first semester of 2007, one quarter less than compared to the previous semester (8,700) and seven per cent less compared to the first semester of 2006 (7,000). Despite those decreases, both were, respectively, fourth and fifth largest source countries of asylum-seekers during the first two quarters of 2007.

Only the applications by 16 of the 40 main asylum-seeker nationalities increased during the first six months of 2007 as compared to the last six months of 2006. Among the major source countries of asylum-seekers, significant increases were registered by asylum applicants from **Pakistan** (+58%), **Iraq** (+45%), the **Syrian Arab Republic** (+43%), **Sri Lanka** (+14%), **Somalia** (+13%), and **Mexico** (+12%). Conversely, out of the 22 nationalities which recorded a decrease in the first semester of 2007 as compared to the second half of 2006, seven registered a drop of more than 25 per cent. This included asylum applicants originating from the **Islamic Republic of Iran** (-30%), the **Russian Federation** (-25%), and **Eritrea** (-28%).

The distribution of asylum-seekers in industrialized countries as described above reflects general trends. However, they hide the fact that certain nationalities tend to cluster in a limited number of countries. For instance, more than half of all Chinese asylum applications (52%) in the first semester of 2007 were submitted in the **United States of America** alone. Similarly, seven out of 10 Iraqi asylum claims were lodged in **Sweden** (47%), **Greece** (18%), and **Spain** (8%) while more than half of the 6,500 Russian asylum applicants were registered in **France** (19%), **Poland** (17%), and **Austria** (16%). On the other hand, Russian asylum-seekers constituted more than 80 per cent of all asylum claims in **Poland** during the first six months of 2007. In addition, virtually all applications lodged by **Mexican** nationals during the first half of 2007 were submitted in **Canada** (69%) or the **United States** (31%), a phenomenon which has been observed for some years now. Likewise, roughly seven out of 10 **Somali** asylum claims were submitted in three countries, namely **Sweden** (33%), the **United Kingdom** (21%), and the **Netherlands** (20%).

Some changes occurred in the ranking of the main countries of origin of asylum applicants. From Q2 of 2006 to Q2 of 2007, individuals originating from **Pakistan** moved up the list from the 12th to the 3rd position. Similarly, **Mexico** became 6th most important source country in Q2 of 2007 as compared to Q4 of 2007 (12th). In contrast, asylum applicants from the **Russian Federation** dropped from 3rd to 5th during the same period. After having been among the leading countries of origin of asylum-seekers up to the first half of 2006, **Turkish** asylum-seekers now ranked 10th throughout 2007. Conversely, **Colombia**, the **Islamic Republic of Iran**, and **Haiti** are no longer present in the top-10 ranking, since less asylum applications have been submitted by people from these three countries in the second quarter of 2007.

Country of origin	2005				2006				2007	
	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2
Iraq	5	5	5	4	1	2	1	1	1	1
China	3	2	3	3	2	1	2	2	2	2
Pakistan	14	7	8	10	12	12	10	6	3	3
Serbia/Montenegro*	1	1	2	2	3	4	4	4	4	4
Russian Federation	2	3	1	1	4	3	3	3	5	5
Mexico	22	21	14	15	18	11	7	12	9	6
Somalia	11	14	9	13	11	10	5	11	7	7

Sri Lanka	15	16	19	17	15	16	15	14	11	9
Turkey	4	4	6	5	5	5	8	9	10	10

* No separate data available for both countries.

⁶ As already indicated in the introduction, separate statistics for asylum-seekers originating from Serbia and Montenegro are not yet available in most of the countries covered by this report.

Monthly trends

The latest monthly data indicate that the number of new asylum applications submitted in the **36 industrialized countries** covered by this report fell by six per cent in June as compared to May 2007. The **United States of America** continued to be the main recipient country of asylum-seekers, despite experiencing a 16 per cent drop from May to June. It nevertheless accounted for 18 per cent of all asylum requests lodged in June 2007, followed by **Sweden** (12%), **Greece** and **France** (10% each).

Iraq remained the main asylum-seeker nationality in June 2007, despite having witnessed an 18 per cent fall from March to June 2007. The number of **Chinese** asylum applications also decreased between May and June 2007 (-7%) while those lodged by nationals of the **Russian Federation**, **Pakistan** and **Serbia and Montenegro** increased by 10, 27 and 12 per cent respectively.

Asylum Levels and Trends in Industrialized Countries, Second Quarter 2007

Table 1. Quarterly asylum applications lodged in 36 industrialized countries, 2005 to second quarter 2007

Notes

All figures are provisional and subject to change.

Germany: new applications only.

Japan: includes UNHCR estimates.

Netherlands: The 2007 data excludes repeat and reopened applications and is therefore not directly comparable to previous data.

United Kingdom: data rounded to the closest 5.

United States:

- new asylum applications registered by the Department of Homeland Security (DHS): number of cases, multiplied by 1.4 to reflect the number of persons;

- new ("defensive") requests lodged with the Executive Office for Immigration Review (EOIR), based on the number of persons.

EU-old: European Union member countries until May 2004, excluding Italy (no data available).

EU-new: 12 new EU member states, which acceded on 1 May 2004 and 1 January 2007 respectively.

EU-total (24): All EU member states as at 31 December 2006, except Italy (no data available).

EU-total (26): All EU member states as at 1 January 2007, except Italy (no data available).

Nordic region: Denmark, Finland, Iceland, Norway and Sweden.

Western Europe: EU-old plus Iceland, Liechtenstein, Norway and Switzerland.

Central Europe: Bulgaria, Croatia, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia and Slovenia.

Southern Europe: Cyprus, Greece, Malta, Portugal and Spain.

Europe: All 31 European countries listed.

Non-Europe: All 5 non-European countries listed.

Total: All countries listed.

Source: Governments; compiled by UNHCR (FICSS).

Asylum Levels and Trends in Industrialized Countries, Second Quarter 2007

Table 2. Asylum applications lodged in 36 industrialized countries by origin, first quarter 2005 to second quarter 2007

Covering all 36 asylum countries listed in Table 1. Top-40 ranking of countries based on applications lodged during second quarter of 2007.

Totals between this Table and Table 1 differ because USA (DHS) by origin reflect the no. of cases.
