

ASYLUM LEVELS AND TRENDS IN INDUSTRIALIZED COUNTRIES

FIRST HALF 2008

**Statistical Overview of Asylum Applications Lodged
in 38 European and 6 Non-European Countries**

17 OCTOBER 2008

I. Introduction¹

This report summarizes the main levels and developments in the number of individual asylum claims submitted in Europe and selected non-European countries during the first six months of 2008. It covers the 38 European and 6 non-European States that currently provide monthly asylum statistics to UNHCR. The numbers in this report reflect applications made at the first instance of asylum procedures. Applications at appeal instance are not included. This report does not include information on the outcome of asylum claims or on the admission of refugees through resettlement programmes, which is available in other UNHCR reports.²

The group of countries included in this report is collectively referred to as the “**44 industrialized countries**” and has been defined for the purpose of this report only. The 44 countries are: 27 Member States of the European Union and Albania, Bosnia and Herzegovina, Croatia, Iceland, Liechtenstein, Montenegro, Norway, Serbia, Switzerland, The former Yugoslav Republic of Macedonia and Turkey, as well as Australia, Canada, Japan, New Zealand, the Republic of Korea and the United States of America.

UNHCR’s data collection of monthly asylum statistics has expanded in the course of 2007 with Albania, Bosnia and Herzegovina, Montenegro, Serbia³, the Republic of Korea, Turkey and The former Yugoslav Republic of Macedonia being included. In view of the introduction of improved statistical reporting systems, Italy has been added in 2008, making it the 44th country to participate in UNHCR’s asylum data monitoring system. In order to ensure comparability over time, UNHCR’s database has been updated retroactively by incorporating monthly asylum statistics for the first six new countries since at least 2005. Monthly data for Italy, however, is available only from 2008. As a result of this expansion, previous UNHCR reports analysing monthly asylum trends may differ from the current one in terms of scope and data availability, and are thus not necessarily comparable.

To the extent possible, the statistics presented in this document reflect the number of asylum-seekers lodging an application for the first time. However, it appears that a significant number of countries included in this report cannot distinguish new asylum applications from reopened or repeat claims in their statistical systems. As a consequence, some of the numbers reported to UNHCR are likely to include repeat applications, and therefore do not necessarily reflect the actual number of new asylum-seekers. Moreover, although asylum-seekers are counted only once in each country, the regional numbers are proportionately higher because some individuals seek asylum in more than one country.

The data in this report is based on information available as at 9 October 2008, unless otherwise indicated. **All figures based on monthly statistics should be considered as provisional and subject to change.** Due to retroactive changes and adjustments, some of the data included in this publication may differ slightly from those reported in previous UNHCR documents, or from the official annual figures published by States. This is the case, for instance, for Germany (see the notes in Table 1 for more information).

All of the data in this document refer to the number of individuals, with the exception of the United States of America and Belgium. Only the number of cases (which can include several

¹ This report has been prepared by the Field Information and Coordination Support Section (FICSS), Division of Operational Services at UNHCR Headquarters in Geneva. Any questions concerning this document should be addressed to FICSS at stats@unhcr.org. For other UNHCR statistics, visit UNHCR’s Statistical Online Population Database at <http://www.unhcr.org/statistics/populationdatabase>.

² See UNHCR’s 2007 *Global Trends* report (issued June 2008).

³ The monthly asylum data for Serbia excludes Kosovo.

individuals) is available for applications submitted to the Department of Homeland Security (DHS). UNHCR has therefore multiplied the total number of asylum cases by a factor of 1.4 to estimate the number of individuals, as historical data suggest that, on average, one case equals 1.4 individuals. Applications submitted to the Executive Office of Immigration Review (EOIR), however, are recorded as individuals. Owing to the large variation in family size by nationality, the analysis by country of origin in the United States of America is based on a combination of the number of cases (DHS) and the number of individuals (EOIR). In the case of Belgium, accompanying dependents are not included in the figures.

II. Overview of regional trends ⁴

Monthly asylum statistics for Italy are available only from January 2008. This poses difficulties when analysing trends in the 44 industrialized countries over time. As a consequence, all asylum trends provided in this section exclude Italy. The latter is, however, included when data for 2008 only is referred to.

The number of asylum claims submitted in industrialized countries in 2007 rose by 9 per cent compared to 2006. This upward trend has continued during the first half of 2008 with data showing an increase of 3 per cent compared to the first half of 2007. Overall, an estimated 165,100 asylum claims were submitted in the 44 industrialized countries during the first half of 2008.

An analysis of semester trends of monthly asylum data available to UNHCR (1999-2008) shows a relatively clear seasonal pattern. Every year, with the exception of 2004, the number of asylum applications submitted during the first semester was lower than during the second semester. Assuming that current patterns remain unchanged, it may be expected that the number of asylum claims lodged in the 44 industrialized countries during the whole of 2008 could be between 330,000 and 360,000. In other words, the number of asylum claims lodged during 2008 might go up by some 10 per cent, when compared to 2007.

In the 38 **European** countries included in this report, close to 120,000 new asylum applications were submitted during the first six months of 2008, accounting for 73 per cent of all claims lodged in the 44 industrialized countries.

The 27 countries of the **European Union** (EU) registered 103,500 new asylum applications during the first six

months of 2008. Excluding Italy, where no pre-2008 monthly data is available, the EU-26 recorded more than 96,300 new claims during the first semester of 2008, 11 per cent less than during the second half of 2007, and 3 per cent less compared to the first half of 2007.

With 6,600 asylum claims registered during the first half of 2008, countries in **Central Europe** witnessed a 12 per cent increase compared to the corresponding period of 2007. The 2008 figure, however, was 43 per cent below the one registered during the second half of 2007.

Asylum claims lodged in selected regions by semester

	1 st 2006*	2 nd 2006*	1 st 2007*	2 nd 2007*	1 st 2008*	1 st 2008**
Europe	99,300	111,400	111,500	122,300	112,800	120,000
- EU-total	89,800	99,500	99,700	108,200	96,300	103,500
- EU-old	81,000	88,600	90,200	92,300	86,700	93,900
- EU-new	8,700	11,000	9,500	15,900	9,700	9,700

Japan/ Rep. of Korea	620	610	690	840	840	840
Australia/ New Zealand	1,900	1,900	2,100	2,200	2,100	2,100
Total	138,120	152,410	152,690	164,840	157,940	165,140

* All figures exclude Italy. ** All figures include Italy.

See notes in Table 1 for list of countries included.

⁴ See notes in Table 1 for a list of countries included under each regional grouping.

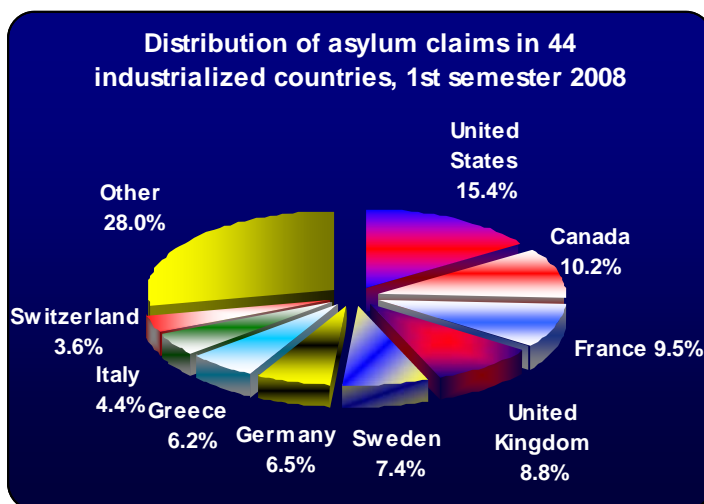

Southern Europe experienced a significant decrease in asylum applications in the first six months of 2008 compared to the last half of 2007 (-10%), and in particular compared to the corresponding period of 2007 (-20%).⁵ This decrease, however, was not uniform across the region. In Malta, for instance, the number of asylum claims lodged during the first six months of the year in fact tripled compared to the first half of 2007 while in Turkey they went up by 50 per cent. It is important to note that the 2007 figures in Southern Europe were exceptionally high because of, among others, new arrivals, particularly from Iraq. Overall, Southern Europe received 27,800 asylum applications during the first semester of 2008.

Similar to Southern Europe, the **Nordic region** accounted for a decrease in new asylum claims, albeit at a lower level. Here, a total of 19,700 persons applied for refugee status between January and June 2008, a striking 19 per cent decrease compared to the last half of 2007 and 9 per cent less compared to the first six months of 2007 (*see Table 1*). This decrease has been caused primarily by fewer individuals applying for asylum in Sweden. This is in stark contrast to the other Nordic countries which witnessed either increases or remained stable. Indeed, Norway recorded 5,400 applications between January and June 2008, the highest level in one semester since the second half of 2003 (10,000).

The number of asylum claims submitted in **North America** during the first six months of 2008 (42,200) increased by 10 and 7 per cent respectively, compared to the first (38,400) and second (39,500) semesters of 2007, primarily as a result of more individuals requesting refugee status in the United States of America. The number of asylum-seekers in **Australia** remained stable during the first half of 2008 (2,000 claims), compared to both semesters of 2007. In **Japan**, 670 individuals requested refugee status during the first half of 2008: this was the highest level per semester on record since Japan was included in UNHCR's asylum monitoring system,⁶ up from 370 applications in the corresponding period last year.

III. Countries of asylum

The **United States of America** has been the by far largest single recipient of new asylum claims during the first six months of 2008. An estimated 25,400 individuals submitted an application, some 2,900 more than during the second semester of 2007, but 1,600 less than during the first semester of 2007 (27,000). During the first half of 2008, the United States of America received 15 per cent of all applications lodged in the 44 industrialized countries covered by this report. Its annual share in the number of new asylum claims received among the group of industrialized countries remained fairly stable in recent years, ranging between 16 and 19 per cent.

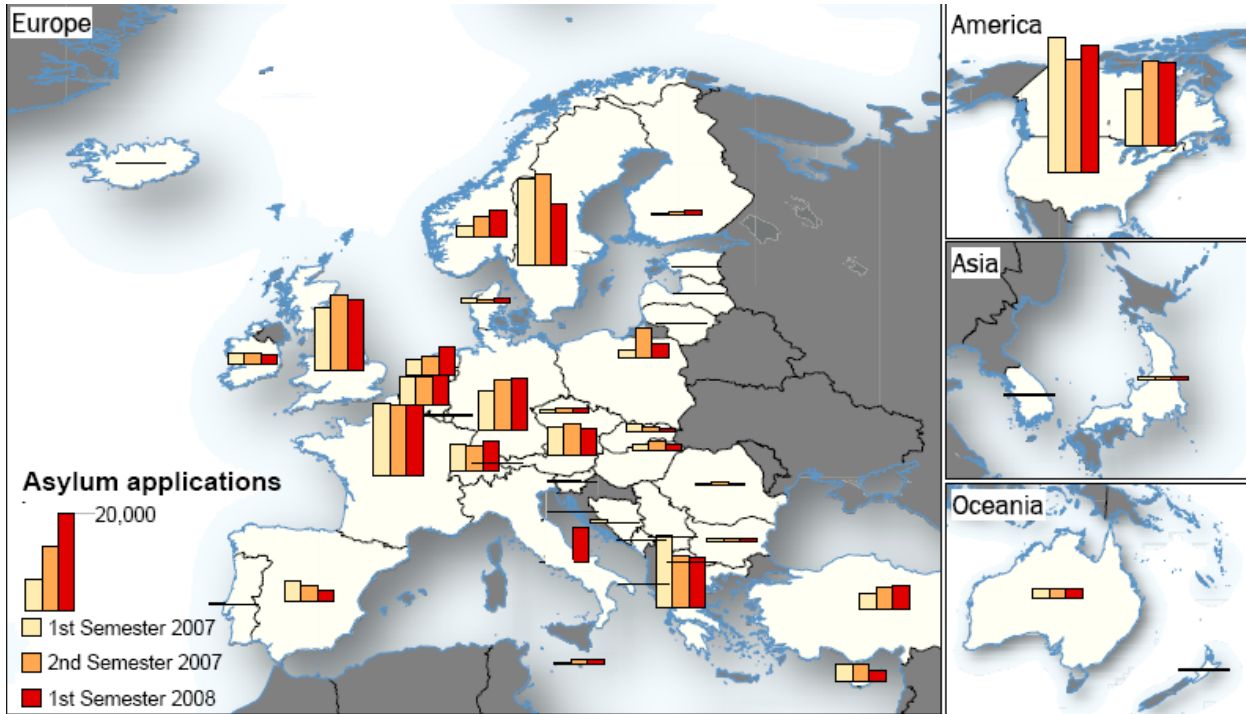

Canada ranked second among the 44 industrialized countries, with 16,800 new applications registered during the first half of 2008. This means that on average every tenth application in the

⁵ Figures exclude Italy.

⁶ Monthly asylum data for Japan is available from 2002.

industrialized world was received by Canada. The figure has remained fairly stable compared to the second semester of 2007 (17,000 claims), but was 48 per cent higher than during the first half of 2007 (11,400). Indeed, the last two semesters were the highest levels witnessed since the second half of 2003.

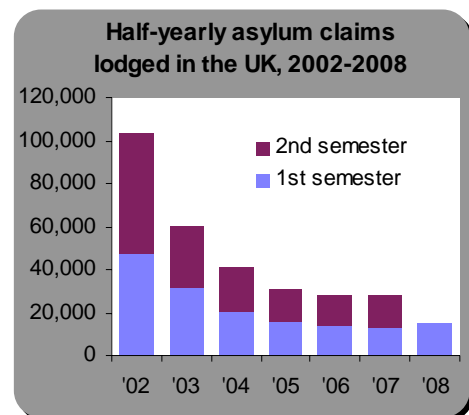

**Trends in asylum claims lodged in 44 industrialized countries:
1st semester 2007 to 1st semester 2008**

Note: Figures for **Italy** prior to 2008 are not available.

France has been the leading asylum-seeker receiving country among the group of industrialized countries for much of 2003, 2004 and 2005. While figures have decreased sharply ever since, at times by even more than 50 per cent, the latest statistics indicate that the trend is reversing once again. The 15,600 claims submitted between January and June 2008 constituted an increase of 6 per cent compared to the corresponding period of 2007 (14,700), and an 8 per cent increase compared to the second half of 2007 (14,500). Much of the recent development can be attributed to asylum-seekers from Mali who lodged more than 1,600 asylum claims between January and June 2008, compared to a total of 610 during the whole of 2007. France was thus the third largest recipient of asylum-seekers among the industrialized countries during the first half of 2008.

The **United Kingdom** ranked fourth among the 44 industrialized countries with 14,500 new applications received during the first semester of 2008. This constituted a 4 per cent decrease compared to the second half of 2007 (15,200), but a 15 per cent increase compared to the first half of 2007 (12,700). These figures are, however, far below those of the peak year of 2002 when some 103,000 individuals requested refugee status in the United Kingdom.

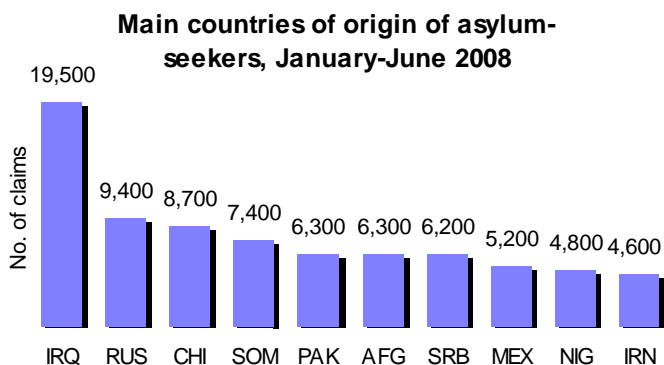

Following a significant decrease in the number of people, particularly Iraqis, requesting refugee status in the country, **Sweden** dropped from the second to the fifth largest recipient of new asylum-seekers during the first semester of 2008. A total of 12,300 people lodged an asylum application during this period, a 34 per cent decrease compared to the 18,600 claims which had

been lodged during the second semester of 2007. Sweden was followed by **Germany** (10,700 claims during January-June 2008), **Greece** (10,200), **Italy** (7,200), and **Switzerland** (5,900).

IV. Origin of asylum-seekers

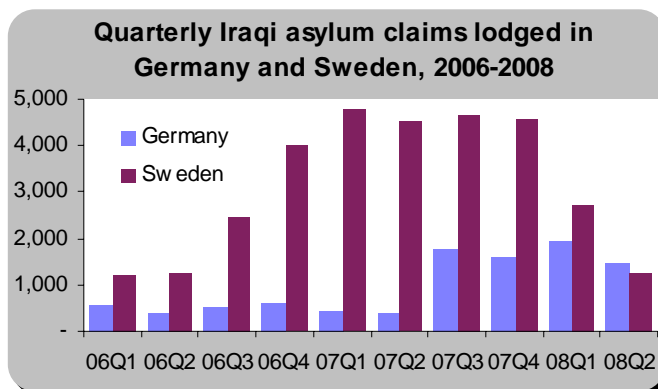

Iraq remained the leading country of origin of asylum applicants during the first six months of 2008. Despite fewer of its citizens lodging asylum claims in the 44 industrialized countries, the number of Iraqi claims was twice higher than of those submitted by asylum-seekers originating from the **Russian Federation**, the second most important source country. Other important source countries of asylum-seekers are **China, Somalia, Pakistan, Afghanistan, and Serbia**.

Iraq again became the main country of origin of asylum-seekers in industrialized countries in 2006, after having been the main source country previously in 2000 and 2002. This trend has continued into 2007 when more than 45,000 new asylum claims were lodged in the 44 industrialized countries. During the first half of 2008, Iraqis lodged 19,500 asylum claims or 12 per cent of all applications in the 44 industrialized countries.⁷ This constitutes a

significant decrease compared to 2007: 18 per cent compared to the last six months of 2007 (23,500; excluding Italy) and almost 10 per cent compared to the first half of 2007 (21,400; excluding Italy).

The decrease in Iraqi claims was particularly significant between April and June of 2008 when 8,800 Iraqis applied for asylum in the 44 industrialized countries, the lowest quarterly level since the fourth quarter of 2006. During the first six months of 2008, Iraqis lodged asylum applications in 36 out of the 44 industrialized countries covered by this report. One in five of the 19,500 Iraqi applications were submitted in **Sweden** (3,900), the latter having attracted the highest number of Iraqi asylum-seekers for some time. **Germany** registered 3,400 Iraqi asylum claims, the same level as in the preceding six months, but four times more than in the first half of 2007 (820). A change in Swedish decision-making on Iraqi asylum claims following the Migration Court's determination that the situation in Iraq is not one of "armed conflict" led to a significant fall in recognition rates and a shift in flows.⁸ Arrivals in Sweden thus dropped but rose in Germany, the Netherlands and Norway.

Greece recorded some 1,200 Iraqi claims between January and June 2008, as compared to 3,500 during the same period of 2007, while the **Netherlands** and **Turkey**⁹ recorded 2,400 and 2,700 Iraqi applications respectively during the first semester of 2008.

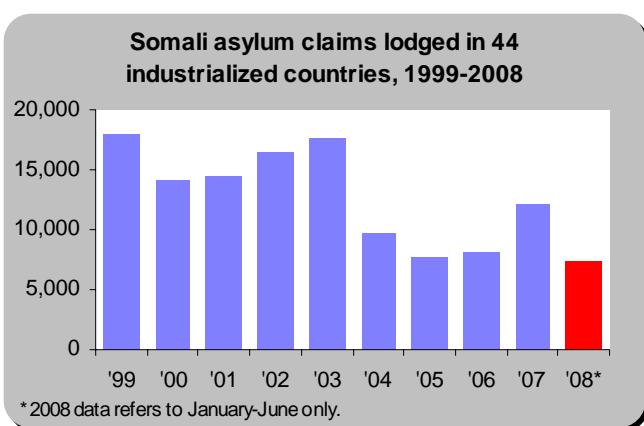

⁷ Some 285 Iraqi asylum claims were submitted in Italy during the first six months of 2008 compared to 190 in 2007. Given the relatively low number of Iraqi claims in Italy, the trend remains unchanged.

⁸ Swedish Migration Court of Appeal, caseno. UN23-06, 26 February 2007.

⁹ Refers to asylum applications submitted to UNHCR.

Similar to the second semester of 2007, asylum-seekers originating from the **Russian Federation** were the second largest group, with 9,400 new claims recorded during the first six months of 2008, thus accounting for 6 per cent of all asylum claims in the 44 industrialized countries. The first half of 2008, however, witnessed a 23 per cent drop in the number of Russian asylum claims compared to the second half of 2007 (12,200 claims).¹⁰ This significant decrease can be attributed primarily to Poland, the main destination for Russian asylum-seekers in 2007 and 2008. Indeed, the Polish authorities registered about half the number of Russian claims between January and June 2008 (2,800) as compared to the period from June to December 2007 (5,400).

The number of new asylum applications submitted by citizens from **China** has remained fairly stable. Some 8,700 Chinese asylum-seekers were registered in the first half of 2008, virtually the same number as in the preceding two semesters (8,600 each). Since 2002, however, the number of Chinese nationals requesting asylum in the 44 industrialized countries has declined by one third, and in 2007 reached its lowest level in a decade.

While the top three source countries of asylum-seekers in the 44 industrialized countries showed either a downward or stable trend, the number of **Somali** asylum applications continued to remain high during the first half of 2008, reflecting the deteriorating situation in the country. Indeed, more than 7,400 Somali asylum-seekers were registered in the 44 industrialized countries between January and June 2008. This figure compares to the 5,000 Somali claims in the first half, and 6,600 in the second half of 2007. Both figures, however, exclude data for Italy where no monthly asylum statistics are available.¹¹ The 7,400 Somali asylum applications submitted in the first semester of 2008 are the highest level on record since the second semester of 2003 (9,300 asylum claims, excluding Italy), making it the fourth largest source country of asylum-seekers among the 44 industrialized countries.

With more than 6,300 asylum claims lodged by its citizens during the first semester of 2008, **Pakistan** became the fifth most important source country of asylum-seekers, after having been third only one year ago. This drop comes mainly as a result of fewer Pakistani citizens applying for asylum in Greece (-19%).

As for Somalis, the number of **Afghan** citizens requesting refugee status in the industrialized world continues to increase. With close to 6,300 new applications recorded during the first six months of 2008, Afghanistan is now the sixth most important source country of asylum-seekers. Excluding the 700 Afghan asylum claims lodged in Italy between January and June 2008, the increase amounted to 22 per cent compared to the corresponding period of 2007, and to 42 per cent since the corresponding period of 2006.

Other important source countries of asylum-seekers in the 44 industrialized countries during the first half of 2008 were **Serbia** (6,200 claims), **Mexico** (5,200), **Nigeria** (4,800), the **Islamic Republic of Iran** and **Sri Lanka** (4,600 each).

Other important source countries of asylum-seekers in the 44 industrialized countries during the first half of 2008 were **Serbia** (6,200 claims), **Mexico** (5,200), **Nigeria** (4,800), the **Islamic Republic of Iran** and **Sri Lanka** (4,600 each).

¹⁰ Italy registered 36 Russian asylum claims in 2007. Given the low number, the trend remains unchanged.

¹¹ Italy registered 760 Somali asylum claims during 2007.

Excluding Italy due to the unavailability of comparable data, applications by half of the 40 main asylum-seeker nationalities increased during the first six months of 2008 as compared to the last six months of 2007. Among the major source countries of asylum-seekers, significant increases were registered by asylum applicants from **Mali** (+174%), **Zimbabwe** (+29%), **Myanmar** (+23%), **Afghanistan** (+16%), **Sri Lanka** (+14%), **Côte d'Ivoire** (+14%), **Georgia** (+13%), and the **Democratic Republic of the Congo** (+12%). Conversely, among countries of origin whose nationals lodged 1,000 or more asylum claims during the first semester of 2008, major decreases were recorded among asylum applicants originating from **Colombia** (-32%), the **Russian Federation** (-23%), **Serbia** (-19%), **Iraq** (-18%), **Pakistan** and **Eritrea** (-12% each).

The distribution of asylum-seekers in industrialized countries as described above reflects general trends. However, these figures hide the fact that certain nationalities tend to cluster in a limited number of countries. For instance, virtually all applications lodged by **Mexican** nationals during the first half of 2008 were submitted in Canada (72%) or the United States of America (28%), a phenomenon which has been observed for some years now. More than half of all **Chinese** asylum applications (57%) lodged during the first semester of 2008 were submitted in the United States of America alone, and more than half of the 6,300 asylum applications from individuals originating from **Pakistan** were lodged in Greece (56%).

On average, 6 out of 10 **Iraqi** asylum claims were lodged in four countries: Sweden (20%), Germany (18%), Turkey (14%), and the Netherlands (12%). The same proportion can be observed for the 6,500 asylum applicants from the **Russian Federation** who were registered mainly in Poland (30%), France (18%), and Austria (16%). **Somali** asylum requests, on the other hand, were concentrated in four countries, namely Sweden (23%), the Netherlands (19%), the United Kingdom (12%), and Italy (10%). More than half of the 6,300 **Afghan** asylum claims were lodged in the United Kingdom (26%), Greece (16%), and Italy (11%).

TABLE 1 NOTES:

All figures are provisional and subject to change.

a. Country notes

Belgium: Excludes accompanying children.

Denmark: Asylum claims in Denmark exclude Iraqi interpreters who have worked for the Danish Forces in Iraq.

France. Includes asylum applications of minors.

Germany. The delay of registering people as well as changes in the registration procedures result in discrepancies between the cumulative total of monthly asylum claims and the total number of asylum claims in Germany. Tables 1 to 15 reflect the former and are thus based on monthly totals.

Based on cumulative total annual figures, Germany registered 21,030 asylum claims in 2006 and 19,160 in 2007.

Netherlands. Data prior to 2007 include a significant number of repeat applications. The 2007-2008 figures are thus not comparable with previous years.

Spain. Includes applications lodged at Spanish embassies.

Turkey. Source: UNHCR.

United Kingdom: data rounded to the closest 5.

United States. Figures include (1) statistics from the Department of Homeland Security (DHS), based on the number of cases and multiplied by 1.4 to estimate the number of individuals; and (2) the number of new ("defensive") requests lodged with the Executive Office for Immigration

Review (EOIR), based on the number of individuals.

b. Regional classification

EU-"old" (15). Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, Sweden and UK.

EU-"new" (12). Bulgaria, Cyprus, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovak Republic and Slovenia.

EU-Total (27). EU-"old" and EU-"new".

Nordic region (5). Denmark, Finland, Iceland, Norway and Sweden.

Central Europe (11): Bulgaria, Croatia, Czech Rep., Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia and Slovenia.

Western Europe (19). EU-"old" plus Iceland, Norway, Liechtenstein and Switzerland.

Southern Europe (8). Albania, Cyprus, Greece, Italy, Malta, Portugal, Spain and Turkey.

Western Europe (19): EU-old plus Iceland, Liechtenstein, Norway and Switzerland.

Europe (38): All 38 European countries listed.

Non-Europe (6) : All 6 non-European countries listed.

North America (2): Canada and United States of America.

Total (44): All countries listed.

Asylum Levels and Trends in Industrialized Countries, First Half 2008

Table 2. Asylum applications lodged in industrialized countries by origin, first quarter 2006 to second quarter 2008

Covering all 44 asylum countries listed in Table 1. Top-40 ranking of countries based on applications lodged during second quarter of 2008 (excluding Italy).

Totals between this Table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.

Asylum Levels and Trends in Industrialized Countries, First Half 2008

Table 8. Asylum applications lodged in Canada and the United States by origin, first quarter 2006 to second quarter 2008

Top-40 ranking of countries based on applications lodged during second quarter of 2008.

Totals between this Table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.

Figures between 1 and 4 have been replaced with an asterisk.

Asylum Levels and Trends in Industrialized Countries, First Half 2008

Table 14. Monthly asylum applications lodged in 44 industrialized countries by origin, 2008

Top-40 ranking based on applications lodged during June 2008.

Totals between this Table and Table 1 differ because figures for the United States (DHS) by origin reflect the number of cases.

Origin	2008						Total
	Jan.	Feb	Mar	Apr	May	Jun
